

## Becoming a Clickbank Super Affiliate Virtually Overnight

In this article I am going to give you a detailed plan on how to promote Clickbank products and make massive profits almost instantly, from selling other peoples products. I'm going to start by talking to you about Clickbank and affiliate programs, then continue on to show you some amazing techniques that you can use.

I know that if you will follow the plan, you can be the next 'Clickbank Super Affiliate'. Just remember me in your will.

Let's get started with explaining who clickbank is and they could become your best friend very quickly.

Clickbank is a middle station between affiliates and product sellers, they are an affiliate network. They generally deal with information products and membership sites. No physical products are sold through Clickbank.

As stated on the Clickbank site they have over 100,000 affiliates which is a massive amount. This makes them the largest seller of information products in the world! You can check all of the products that Clickbank sells in the Clickbank marketplace.

Clickbank is ranked so highly because it is very trustworthy and they also have some of the highest payouts online. It can go up to 75% of the sale. 75%. These are some good paydays when you start promoting.

The top ten affiliates of a clickbank product is called a 'Clickbank Super Affiliate'. And for good reason, they worked hard to get there... OR... they had a big list who loves them. Hint. Hint.

(Hint: Becoming a clickbank super affiliate means doing more than the average internet marketer. But once you have a formula. Voila!

We go over and beyond the call of duty but it is well worth it, I assure you.

We build a relationship with potential customers making a sale much more likely. Building trust with potential clients is an important part of becoming a super affiliate.

As a clickbank super affiliate we drive high numbers of laser targeted traffic to the site to guarantee that all important sale. We don't do all the work; we use simple, tested methods that constantly work. To beat the competition you have to be better, stronger and more persuasive than them.

### How To Find Hot Products

Finding a good product on Clickbank starts with see what is selling already. Find the hot spot and enjoy the sun. The sales page and the infoproduct will be good if it is already selling well.

People don't buy crap!

\*\*There's ways to work around their sales page that we'll get into later.

First of all you need to figure out what niche you want to run with. Try to find something you are interested in and have some knowledge about. This is not a given but makes everything else easier.

If you didn't check out Clickbank Marketplace, now is the time. That way I can walk you through it.

You should write your niche as the keyword and sort by 'High Gravity'. This will show related products, the ones that convert highest first, the lowest last. You need to find a good product that converts high if you want to make a profit from the traffic you send to the affiliate's site.

Everything you need to know about this product can be found here. The sales page... the affiliate page... the payout... it's all here.

\$Earned/Sale - This is the amount earned per sale. The bigger the number... the more you earn. This is a good thing.

Future \$ - This is how much will be made in the future; this is usually for membership sites or re-bills.

Total \$ - This is the average earnings from the initial sales as well as re-bills.

%Earned/Sale - Percentage of the sale price you will earn. This is always between 1% and 75%. My favorites are the 75% ones.

%Referred - This is the percentage of sales that are made by affiliates.

Gravity - This basically shows how popular the product has been recently. Usually the higher this number is the better. Another way to look at it is to think of how many people are promoting this product.

Once you have done a search and found some suitable products you need to find the one that is going to start making you some money. You need to checkout the website and read through the sales copy. Does it make you want to buy? Would it persuade potential customers to buy? It should.

Check out the affiliate page. Most should include email templates, articles with private label rights and promotion banners which can all be used to promote their products. The more free promotional tools you have to promote the product, the better.

One of the biggest mistakes I see newbies do is just to pick a product because it seems to sell well. Wrong. Go to Google and search the name of the product. How many ads do you see on the right.

It's incredibly hard to find the right product to promote. A lot of people who want to become clickbank super affiliates go after the make money sites and to me this is a mistake. The big boys dominant these sites and there are so many niches that are better.

It makes for a better start to go after small niches, like knitting or cross-stitching to name a couple.

Take the time to dig deep and find a good product. This is the foundation and this will either make you or break you. Researching in the beginning is vital. Now, don't let me see you researching a month from now... but take a day or two.
